Bilgorod-Dnistrovskiy, Odesa region, Ukraine

Trainee\Junior QA Engineer

Summary

Before studying testing, I completed the “Discovery Program” from Women Go Tech and made a conscious choice that it was in the testing profession that I would be able to use all my soft skills to the maximum. While studying theory and practice, I realised that I liked this business more and more. I like to research new topics and study them thoroughly. If I have concerns about solving a problem, I will still make every effort to solve it.

Technical Skills

Operating Systems

- Microsoft Windows XP/7/8/10
- Android

Database servers

- MySQL
- SQL/SQL Server

Tools and Technologies

- Rest API
- Postman
- Fiddler Classic
